**ITEM #5 Status update on New Melones operations including SWRCB Substitute Environmental Document (SED) 2016-2017**

Counsel O’Laughlin provided an update on various water issues impacting Tri-Dam:

- The Districts have filed their comments regarding the Substitute Environmental Document (SED) with the State Water Resources Control Board. A response from the SWRCB is expected in October, followed by hearings and then adoption by the end of the year.
The governor has made one new appointment and one re-appointment to the SWRCB. Both appointments are in favor of at least 30% to 40% unimpaired flows envisioned in the SED.

In view of the heavy precipitation year and the problems at Oroville Dam, the Districts will be drafting a letter to Reclamation advising that the emergency spillway at New Melones needs to be cleaned out. If the spillway needs to be used, heavy debris flow and downstream damage will likely occur if it is not first cleaned out.
